COURSE LENGTH

Four 3-Hour Virtual Sessions or Two Full Days In Person

DESCRIPTION

This review course provides an intensive review of the Essentials of Treasury Management, 7th edition. In addition to reviewing the chapter materials, participants will also discuss and implement test-taking strategies throughout each session. This should help participants to better understand the ways that test questions are created from the content. The course is structured to cover the chapters in an efficient and effective way over the four-sessions. For this reason, chapters that are expected to have a lower impact on exam performance will receive less coverage time. As time permits, the instructor reviews retired CTP exam questions.

LEARNING OBJECTIVES

Participants who successfully complete this course can confidently assume treasury responsibilities in their organizations and learn how to:

- Utilize various types of payment systems and Internet technologies to transfer monetary value and business documents between parties
- Maintain optimal cash positioning through forecasting and short-term investing and borrowing activities

- Employ working capital strategies and tools to efficiently manage current assets and liabilities
- Manage cross-border funds movement and utilize international trade financing methods
- Monitor and control corporate exposure to financial and operational risks
- Coordinate financial functions and sharing of financial information
- Determine proper capital structure, manage costs of long-term capital, and quantitatively evaluate capital resource investments

AGENDA

- Session 1:
 - Role of Treasury Management (Chapter 1)
 - Banks and Financial Institutions (Chapter 3)
 - Legal, Regulatory and Tax Environment (Chapter 2)
 - Payment Instruments and Systems (Chapter 4)
 - Capital Markets Relationship Management and Financial Service Provider Selection (Chapter 7)
 - Financial Accounting and Reporting (Chapter 8)
